# Manish Botta

Software Engineering / Applied AI / Forward-Deployed Delivery

San Francisco, CA | manish.botta@hotmail.com
botta.in | github.com/Manishrdy | linkedin.com/in/manish-reddyb

Software engineer building backend and applied AI systems, from enterprise integrations and retrieval agents to a solo-built B2B SaaS platform. Owns discovery, implementation, deployment, and production operations.

## Experience

### TradeLiv

Founding Software Engineer (product and engineering) | Apr 2026 - Present

- Owned product and engineering as the first hire and sole engineer, taking a B2B SaaS platform from zero to production in four months with 40 REST endpoints, PostgreSQL, and designer, admin, and client access tiers.
- Cut new e-commerce integration time from two days to under 15 minutes by replacing per-site scrapers with a Claude and Puppeteer pipeline that turns product URLs into structured data.
- Ran the stack on one 1GB OCI VM, offloading builds to GitHub Actions and using health-gated cutover with automatic rollback for zero-downtime deployment; owned incidents through customer follow-up.

### Microsoft

Software Engineer (Contract) | Aug 2025 - Apr 2026

- Built a multi-agent orchestration system for field sales across Salesforce, HubSpot, OneDrive, and internal databases on Azure, serving 75,000 daily users and 1.5 million requests over six months.
- Raised retrieval accuracy from 61% to 89% with chunk-level indexing, reranking, and a vector cache in front of the RAG layer.
- Cut per-query inference cost 45% by fine-tuning a smaller model with QLoRA and PEFT and routing simple intents away from the larger model.
- Moved authorization inside the agent loop with Graph API tenant isolation and RBAC per request, restricting retrieval to contracts the requesting persona could access.

### Yellow.ai

Software Engineer | Sep 2021 - Jul 2023

- Delivered conversational-AI systems for 24+ enterprise clients including IHCL, Dr. Reddy's, Bajaj Finserv, and Spotify, scoping use cases with customer teams.
- Held 99.9% uptime on the messaging backbone as the product received 100M+ daily events across all customers, owning consumer services and retry paths on a six-engineer platform team.
- Cut p95 API response time from 820ms to 490ms by rewriting MySQL and MongoDB query plans, adding composite indexes, and caching hot reads in Redis.

### Cognizant

Program Trainee Analyst, Full Stack Developer | Mar 2021 - Aug 2021

- Cut order-lookup response time from 1.2s to 700ms by decomposing a legacy Java monolith into Spring Boot microservices and REST APIs, holding automated test coverage above 80%.

# Selected projects & technical depth

Manish Botta / General engineering resume

## Selected projects

### Coldstart

github.com/Manishrdy/coldstart

Changed-feed ingestion, resume-aware LLM scoring, and an auditable daily digest. Built to run unattended.

- A complete local workflow from public ATS data to a ranked review surface, with explicit spending limits, retry behavior, and an audit trail.

**Stack:** Python, SQLite, Pandas, PyArrow, Pydantic, Ollama, FastAPI

### Role Collector

github.com/Manishrdy/role-collector

An autonomous discovery agent spanning ATS APIs, search, and company watchlists, with freshness-first review.

- An end-to-end discovery, extraction, storage, and review workflow across six ATS connectors, with configurable Langfuse tracing.

**Stack:** nodriver, WebSockets, Langfuse, Playwright, Puppeteer, Python, FastAPI

### SimCricketX

github.com/Manishrdy/SimCricketX

A probabilistic simulation engine with live match state, built and operated as a complete solo project.

- Served 13,000 active users and resolved a 120-delivery match in under five seconds.

**Stack:** Flask, SQLAlchemy, WebSockets, Gunicorn, Nginx, OCI

### Async Audio Pipeline

github.com/Manishrdy/async-audio-pipeline

Independent transcription and summarization workers behind a lightweight FastAPI job interface.

- Reduced turnaround for a one-hour meeting from 45-75 minutes to 7-11 minutes.

**Stack:** FastAPI, Redis, Whisper, Gemini

## Technical skills

**Backend & systems:** Python, TypeScript, Java, FastAPI, Flask, Node.js, Spring Boot, PostgreSQL, Redis, Kafka, WebSockets, SSE

**AI & retrieval:** LangGraph, LangChain, RAG, QLoRA/PEFT, FAISS, BERT, Langfuse, LangSmith, Qwen3 8B embeddings, Whisper, Gemini

**Data & delivery:** MySQL, MongoDB, SQLite, Azure, AWS, OCI, Docker, GitHub Actions, Nginx, OAuth 2.0, RBAC

## Education

### M.S. Computer Science

California State University, San Bernardino | Aug 2023 - May 2025

### B.Tech Computer Science

Amrita Vishwa Vidyapeetham, Coimbatore, India | Jul 2017 - May 2021
